

Reproduction Answer Cards

Our bodies change during puberty so that when we become adults we are able to make babies.

An egg comes from the woman; it is needed to make a baby.

Menstruation is the word for a girl's monthly period.

A small amount of bleeding occurs as the egg and the lining of the womb pass out through the vagina.

Sperm comes from the male; it is needed to make a baby. Each sperm is so tiny you would need a microscope to see that they are shaped like tadpoles.

Sperm are made in the testicles.

Babies are made when one sperm joins with one egg in the woman's body.

Sperm leaves the man's body through his penis.

This is when sperm leaves the boy's penis while he is asleep.

It only takes one sperm to make a baby, although an ejaculation produces about one teaspoonful of semen containing around 300 million sperm.
